Subject: MICROSOFT ANTITRUST, CLASS-ACTION SETTLEMENTS

I do not agree with your proposed settlements, they appear to be a sell out. If you (US) have laws against monopolies you should enforce them or have the laws dropped.

Allowing (forcing) Microsoft to donate S/W, H/W and services to your poorest schools as a punishment is laughable (allowing them a greater monopoly). They should be forced to donate money and allow the schools to decide how best to use it.

I am not anti Microsoft as I am an independant software developer who relies heavily upon their products, I just believe in fair competition.
